

# IACP TECHNOLOGY CLEARINGHOUSE

## Law Enforcement Technology Program Survey

**Agency Name:** [Seminole County Sheriff's Office](#)

**Technology Program Name:** Information Services

**Contact Name:** Ronald Johnson

**Address:** 100 Bush Blvd.

**City:** Sanford

**State:** Florida

**Zip:** 32773

**Telephone Number:** 407-665-6650

**Alternate Phone Number:** 407-665-6645

**Fax Number:** 407-665-6671

**E-mail Address:** [rjohnson@seminolesheriff.org](mailto:rjohnson@seminolesheriff.org)

**Home Page Address:** <http://www.seminolesheriff.org/>

**Agency Size:** N/A

**Agency Type:** County Sheriffs' Dept.

**Technology Program Status:** Permanent Department Wide Program

**How is data transmitted from the Field to the Station?** Wireless

**How is data transmitted from the Station to State and Data Collection Authorities?** Wireless

**Funding Description:** Original 32 laptops and Sierra Wireless AirCards came through COPS MORE Technology grant.

**Hardware Manufacturers:** Laptop - [Panasonic](#) CF-25(161) and CF-27(134)

**Software Manufacturers:** [Seminole County Sheriffs](#) (in-house) - Computer Aided Form Entry (CAFE), Computer Aided Dispatch (CAD), and Automatic Vehicle Locaters; [Florida Dept. of Law Enforcement](#) - CJNET

**Program Narrative:** Mobile CAD provides: 1) FCIC/NCIC access for wanted, stolen, person's D/L & tag listings; 2) Dispatch functions; 3) Car to car messaging and 4) car to dispatcher messaging. District offices have the mobile client on a desktop for everything except FCIC/NCIC access.

Computer Assisted Forms Entry (CAFE) provides "on-line" reporting and reports review functions to the mobile. Mobiles are also able to review previous reports and booking records/photos.

Automatic Vehicle Location (AVL) is in the final testing and initial deployment stages. Deployed units return their vehicle locations to our server each 1/10th of a mile in motion or every 10 minutes when stationary.

CJNet - FDLE - is a web type intranet system that provides drivers license photos, sexual offender information and a host of other information to the mobile user via a web browser.

**Additional Concerns:** Connectivity and coverage issues became key items during development and ways to overcome them have been worked out.
