

## 2007 4<sup>th</sup> Annual IACP-iXP Excellence in Technology Award

**Innovation in Information Technology Category**  
***Large Agency Division Co-Winner (Two Agency Tie)***

**Agency:** Royal Canadian Mounted Police (RCMP)

**Project:** Investigator's Toolbox

The RCMP has developed an innovative E-learning & E-working solution for all investigators across Canada. The purpose of this online tool is to help every police officer improve upon the skills required to effectively and successfully conduct an investigation from start to finish. This online operational support and learning has been built to provide the policing community with quick job aids and learning objects that have been broken down into sixteen criminal investigational 'hard skill' areas. Designed to look like an actual Toolbox, this application opens up to expose trays full of the necessary investigative skills topics. The Toolbox also provides information/job aids related to the more advanced investigations that may require additional specialized skills.
